

Senior Advisor - Actuarial Services, Risk Advisory

- Company: **KPMG in Greece**
- Ref. Code: **SAAS-0819**

Description / Requirements

KPMG in Greece offers an exciting opportunity for career growth. You will be joining one of the leading global networks of professional firms, which is well known for the ability and professionalism of its people and the quality of its services. Due to continued growth of operations we are seeking to employ a Senior Advisor to strengthen our Actuarial services team in Risk Advisory department.

Key duties and requirements include:

- Reporting to a Manager, the appointed candidate will be actively involved in challenging engagements requiring actuarial input, such as supporting clients on all their actuarial related needs including reserving, pricing, capital modelling, reports preparing, etc.
- The appointed candidate will be involved in a wide range of technical projects, take responsibility for successful delivery of engagements and work closely with other members of a diverse project team.

Candidate profile

- University degree in Actuarial Science, Statistics, Mathematics, Economics or other relevant subjects, at postgraduate level. Progress with Actuarial Qualification exams, will be considered an asset.
- A minimum of three years of relevant working experience in an insurance organization, or other consulting firm, preferably with life insurance specialization.
- IT literate. Knowledge of actuarial modeling tools (AFM, Prophet, Moses, ResQ, Igloo, Remetrica, etc.) will be considered an asset.
- Outstanding communication and writing skills in both Greek and English. Capable of presenting technical issues in a clear way to a broad audience, including clients.
- Exceptional analytical, problem solving and project management skills.
- Professionalism, enthusiasm, stress tolerance, client orientation and a team working spirit.

Remuneration

We offer an attractive remuneration package, extensive training locally and abroad and excellent career prospects for professional development within a leading Firm in the Advisory Services market.
